

Ameresco Solar is the **national off-grid solar power leader**. We provide comprehensive solar solutions by distributing quality solar products and components, delivering tough and reliable solar power systems, and offering expert engineering, design, and integration services.

ENGINEERING & DESIGN

Application Consulting, Complete Project Management, CAD Design and Drawings, Electrical and Mechanical Engineering, PE Certification, ETL or UL Certifications for Systems and Products, Retro-fit System Engineering, Turn-key Systems, Battery Backup Systems

SYSTEM INTEGRATION & FABRICATION

Custom Industrial Control Panels, Custom Integrated Enclosures, Unique Wiring, Cable, and Electrical Solutions, UL Listed Components, ETL Certified Systems for C1D2, Stock Control Panels, Custom Enclosures, Welding, Panel Mounts and Mounting Structures, Mobile & Skid Structures

TECHNICAL & FIELD SERVICES

Pre-departure Quality Control Testing, Delivery and Commissioning, Field Troubleshooting, Field Diagnostics, System Overview and Training, Optional FAT Testing

PRODUCTS & COMPONENTS

We offer a full range of components and products from leading industry manufacturers including: Solar Panels, Kits, Batteries, Inverters, Charge Controllers, Mounting, Racking, Enclosures, Control Electronics, Battery Backup Systems, Generators and much more.

MARKETS & APPLICATIONS

Oil & Gas
Cathodic Protection
Pipeline Services
Offshore Drilling
C1D2 Hazardous Areas
Telecommunications
Mining
Control & Automation
Engineering

Meteorological
Seismic
Marine Navigation & Lighting
Security & Surveillance
Railway
Aerospace & Aviation
Military and Defense
Battery Back-Up
Energy Services & Utility
Geospatial & Geophysical Imaging
Emergency Services

Electrical Companies
Solar Integrators & Retailers
Transportation
Agriculture
Environmental Monitoring
Government (Federal, Municipal, County)
Conservation & Water Districts
Mobile & Hybrid
