

Out here the wind howls, the rivers flood, and the light works every time.

Conext XW Series: Off-grid and Grid Interactive

Battery-based inverter systems are ideal for remote locations where off-grid power is required, or for backup when the grid goes down.

The XW Series provides high performance, quick installation time, flexibility, and the best service program in the industry.

Electric[™]

Conext XW Series: for dependable power every time

Customize: From off-grid cabins to small town mini-grids

- Conext™ XW system is comprised of manageable building blocks: Inverter/Chargers, Solar Charge Controller, Automatic Generator Start Module, and System Control Panel
- Modular components for a single- or three-phase system: 4 kW to 36 kW
- Built-in network and sync ports synchronize the invert and charge modes

Reliable: Charge batteries with a generator when utility power is lost

- UL Compliant Dual AC Inputs: grid and generator
- Auxiliary AC input's wide voltage range makes it compatible with more generators

Innovative: Highest charge current and efficiency available

- Conext XW 6048 provides 100 amps
- Best-in-class surge capacity provides 12 kW of real power output to start loads
- System Control Panel (SCP) allows easy configuration and prevents an accidental change of the parameters

All Conext XW system components are backed by comprehensive services:

- Global Service and On-site Support: We can support you anywhere
- Technical Support: Specialist in system design, installation, safety, system operation, and quality
